

# TYPE 90 - 912

## Replacement Seal Kits for Alfa Laval® Pumps

### Features summary:

- Replacement Seal Kits for all common Alfa Laval® pump models
- Compliant with FDA, 3-A Sanitary and EC food industry regulations
- Available Ex-Stock
- Individual components available separately
- 2 Elastomer options
- Different Seal face combinations available

Vulcan's Type 90 to 912 range of Alfa Laval® direct replacement Seal Kits provides you with all the components required to service common Alfa Laval® pump models.

They are a cost-effective alternative to the OEM kits but still include all the correct and required components you need, as well as a premium level of material technology that you can expect from Vulcan.

Like all replacement kits, the Type 90 to 912 range is available **Ex-Stock**, giving you the reassurance that equipment can be repaired on time with high-quality replacement parts, while reducing costs.

Each kit is available in two Elastomer options, as well as with a choice of hard vs soft and hard vs hard seal face combinations, allowing you to cover all applications.

Vulcan Alfa Laval® replacement Mechanical Seals and Seal Kits are also specified to be compliant to FDA, 3-A Sanitary and EC food industry regulations.

### Finding the correct type or part

To find the Vulcan replacement Seal Kit or individual component part required, including pricing and delivery details, you can enter the original Alfa Laval® Seal Kit or component Part Number into our OEM database within your **Vulcan Web Portal** - available exclusively to Vulcan partners and distributors ([portal.vulcan-eng.com](http://portal.vulcan-eng.com)).

If you are still unable to establish which Seal Kit or component you need, you can provide the part numbers to our sales team who will complete the identification and provide you with pricing and delivery information.

### Technical Information:

- Y- Regulatory specified complaint materials
- 316 Stainless Steel with 0.8Ra surface finish
- M825 Triple-Phenolic FDA compliant Carbon
- WNV2 Sintered Silicon Carbide
- O'-Ring materials options: EPDM / Viton® / FEP Encapsulated Silicone

### Other Vulcan products and services

Vulcan also have an extensive range of Seal Kits for Fristam® and APV® pumps, as well as the world's widest range of Mechanical Seals for use in food processing equipment.

A full repair service is also available for high-end Cartridge Type Seals found on Reactors, Mixers and Driers.

**Embrace Excellence, Vulcan Service, Quality and Value**

Mechanical Seals | FEP/PFA Encapsulated 'O'-Rings | Gland Packing | Tefcan Expanded PTFE
